

FEBRUARY 2022 VOL 7 KG II

# TIPS BEACON

THE INDIAN PUBLIC SCHOOL

COIMBATORE

## SPARK PLUG

**“Than words, exploring and taking action makes much noise”**

*Inquiry is the heart of IB. Our kids are inquirers by nature. Inquiry can be done at anytime and anywhere about anything! As a facilitator it's our duty to propel the inquiry in to a meaningful learning outcome. During the discussion of planet Earth, children explored different types of rocks. Children were excited to explain about it and carry out the discussion. During the inquiry process one of our children shared her experience by showing different types of stones and explained unique feature of each stone.*

# LEARNING CURVE

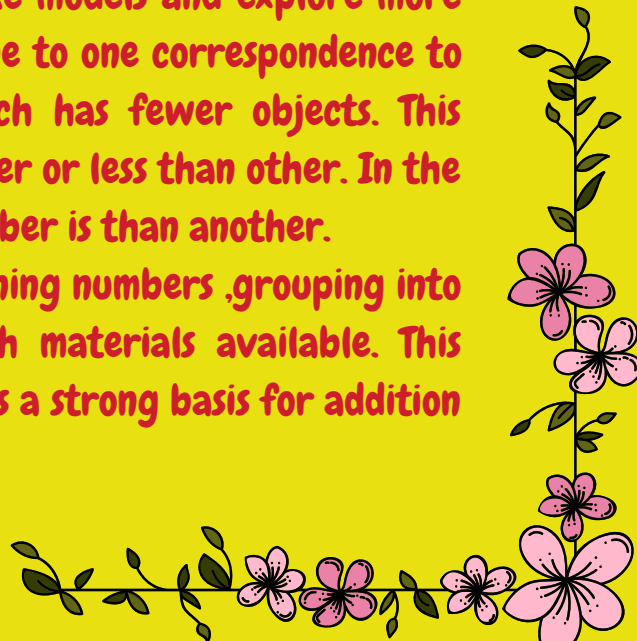

## Creative learning

**“The beautiful thing about learning is that nobody can take it away from you”.- B.B King**

Our little thinkers like fun way of learning to understand a concept . They use class materials and things around at home to make models and explore more about number combinations. They match sets in one to one correspondence to determine which set has more objects and which has fewer objects. This enables them to discover that one number is greater or less than other. In the process they also learn how much more or less number is than another.

Also it is interesting to watch kids learning numbers ,grouping into 2's,5's and 10's and making simple additions with materials available. This practice instills confidence in calculation and builds a strong basis for addition and subtraction.

# PARENT CHRONICLES

**"Stake holders play Vital role as Parent"**

Parent involvement in school activities creates a big impact in the child's learning. Parent talk is a platform for parents to be a part of the fraternity and share their experiences to the little ones in the form of stories or a casual talk. It gives them the opportunity to learn and interact at a very different level. The feedback from the children opens up newer avenues for them to explore and discuss.

# POCKET PHONICS

**'There is more treasure in books than in all the pirate's loot on Treasure Island. Walt Disney'**

Research shows that phonics is taught in a structured manner. Starting with the easiest sounds and progressing through to the most complex, is the effective way of teaching young children. Art as a mode of expression is extremely beneficial for our budding bumblebees. Our young learners creatively presented their understanding of Open vowels. Some of them chose to draw pictures for the Open vowel words while others illustrated the story of JoJo's Yo-Yo. The story left a lasting impression on their minds as they declared that they too wanted to be best at something just as the protagonist in the story- JoJo. Their focus and presentation skills were appreciable. Each child showcased his/her individuality through their work. This activity helped enhance our learners' comprehension skills.

**'There is no substitute for books in the life of a child. Mary Ellen Chase'**

# HEALTH & BEYOND

**“Participants are winners than Winning or losing”**

**It is very important to participate in physical activities .It gives a confident and positive approach to take a step ahead .Every one runs towards winning but than winning taking actions to win makes us stronger. Sometimes losing also teach us to move forward,It gears them up to face bigger challenges in life with clarity.**

# BUDDING INFLUENCER

**“Spring is nature’s way of saying, “Let’s party!”.–Robin Williams.**

**Spring season brings the joy of colors and a ray of hope in our lives, so does the smiles of children! We at TIPS celebrated the season by wearing yellow dress and making beautiful flower carpets. Children enjoyed making colorful flower carpets and the weather made them feel the warmth inside and outside. Nature is an important part of our lives. Celebrating and acknowledging nature should be part of our everyday lives. Hence we all must spend some wonderful time in our gardens with plants, flowers and beautiful butterflies in between these long screen hours in today’s unavoidable situation.**

# POT POURRI

**“Small actions make a big difference”**

It is very important that we value everyone. Responsibility is initiated from our home. Parents are the first facilitators and lead us with good examples. Children will never know their strength until responsibility is given to them. Independent actions enable them to become stronger and empowered. Children must be assured that it is ok to make mistakes and that we must learn from them.

**Lookout notice:**  
*International Women's day*  
*World wildlife day*
