TOK - DEBATE

The topic "Should capital punishment be abolished?" was debated in the TOK session. Within 40 minutes the teams had to be ready with the arguments, analyse the topic, and bring out points, facts, evidence, and claims on the floor. There was good teamwork among our fellow teammates as they were able to prove their points. Our team was not able to bring out credible claims on the dais, because we lacked proper time management. During the argument, I was able to bring out 2 to 3 supporting points as I lacked communication skills and could have improved and communicated much better. However, it was a wholesome learning process that opened my eyes to different perspectives and led to a fruitful discussion on the same.

MEMORANDUM OF UNDERSTANDING BETWEEN THE INDIAN PUBLIC SCHOOL AND *Indian Space Association*

The MOU between The Indian Public School and the Indian Space Association was held on 6th April 2022, in our school in the presence of some of the important members of the Indian Space Association and the Managing Director of TIPS, Mr. Ashok Kumar. The successful event commenced with the speech of the Guests of Honour and the Chief Guest elucidating the vision and motive of the Prime Minister of India, Mr. Narendra Modi to launch satellites by the school students that will have an effect on the future of India's position ahead of time. This project involving school students is a historic moment commemorating the 75th Independence Day of India. The event explored the inquisitiveness of the students pertaining to launching satellites and the probability of a future in space science in the interactive session between the ISRO stalwarts and the students. This is a dream come true for most of us space freaks. I am proud and fortunate to be an integral part of this venture.

pa fest - DANCE PERFORMANCE

Yeah! I feel elated to share that I have overcome two of my greatest fears in life which are to "dance" and "to dance on the stage.". At first, when I agreed to participate in the fest I thought dance would be an easy thing, but soon, I realised that it was not as easy as I thought it would be. Day by day I had to sacrifice my lessons and sports sessions for my dance and spent my time learning all the steps properly...lift, right leg, left leg, coordination,

rhythm, attitude, moves, and the scariest thing is eye contact with the audience and smile. Facing the audience was my biggest hurdle. All these wouldn't have been possible without my friends who spent their time teaching me those steps. And when the big day arrived, our dance crew gave our very best. One thing that I learned is that without practice and determination, nothing would be possible to achieve. Practice makes one perfect and determination strives for us to succeed. So why fear...enjoy life with all its challenges!!!
