TIPS BEACON

Spark Plug

"The more you celebrate your life, the more there is in life to celebrate."

Oprah Winfrey

Celebrations are an excellent platform to bring children closer to each other. It is during celebrations that we create wonderful memories. Children make meaningful connections by interacting with environment around them. Children learn how to greet each other, welcome newer ideas and get a chance to explore their creative side. It is an undebatable fact that celebrations is a lot of fun. TIPS advocates learning things the fun way and to respect one another's diversity. We ensure to celebrate every little moment spent with the little ones. Special days are dedicated in the academic calendar to acknowledge and express gratitude too things and loved ones around us.

Grandparents day:

For the first time ever TIPS celebrated grandparents day inviting all the grandparents to school. A day filled with love, laughter and fun. That was what the Grandparents day was all about. A range of fun games were organised where the grandparents got an opportunity to participate with their grandchildren. A sense of pride fill the air as they played all the games with so much enthusiasm and involvement.

Teachers day:

A good teacher can inspire hope, ignite the imagination, and instil a love of learning. When a student remembers their teachers, that will be a great honour for them. Here the kids of KG-2 show their gratitude by making them colourful and creative greeting card. We are thankful to have great students.

Expert talk:

Good stories surprise us. They make us think and feel. Here our little champs KG-2 explored with our parent into the characters of the story; with joy and surprise. We have many more festivals in India and all these festivals becomes a reason to gather all relatives and friends and forget all the tiredness gained in the whole year and after the festivals, We can work again with more energy!

Ms. Kiruthika
KG 1 Homeroom Teacher

"Celebrations infuse life with passion and purpose.
They summon the human spirit."

Terrence E. Deal

Learning Curve

Learning through play

"Wherever there is number, there is beauty"- Proclus

Everything is a learning experience. One of the finest and most enjoyable way of doing this is through play and activities. By engaging students in hands-on experiences and reflection, they are able to connect the information learnt and knowledge acquired in the classroom to real-world situations.

To demonstrate their understanding in math-Grouping of numbers up to 10 and skip counting in 2's up to 20 the children did two different activities. It was all great fun and students were able to understand them better. Skip counting is so much more. It helps students see patterns in numbers as well as lays a great foundation for number sense and learning the multiplication facts. This is fun and useful tool when teaching this skill.

MATH!

Parent Chronicles

“The best way to make children good is to make them happy.” –Oscar Wilde

When we think of grandparents we are instantly reminded of unconditional love and happiness. The goodies that grandma makes and the games that we play with our grandpa and grandma are the best of any body's childhood. To commemorate the importance of grandparents in our lives, we at TIPS celebrated the Grandparents' day with pomp and show.

Our grandparents were welcomed with handmade crowns and the wishes of their grand children were displayed through a video. Several fun games were organised. Both the grandparent and the grand child took active part in them. Art and craft activities were also organised which saw both of them displaying their creativity to the core. The quality time that they shared with each other was evident and the joy that our grandparents felt was shared in their feedback after the event.

Thanks for a wonderful grandparents' day. It was really amazing. Teachers have definitely put in the best foot forward and the children have out performed themselves. Thank you for guiding them always. (Grandparent of Ajitesh)

We loved the way the whole event was organized and executed. Kindly organize such events on a regular basis. We enjoyed spending time with our grand child. Thanks (Grandparent of Taanya).

Kudos to the entire team for organising such a beautiful event for us.
(Grandparent of Sai Nivrithi).

Pocket Phonics

"If a child memorizes ten words, the child can read only ten words, but if the child learns the sounds of ten letters, the child will be able to read 350 three-sound words, 4,320 four-sound words, and 21,650 five-sound words"
Martin

Knowledge of phonics helps children hear, identify and use different sounds that distinguish one word from another in the English .

Written language can be compared to a code, so knowing the sounds of individual letters and how those letters sound when they're combined will help children decode words as they read. The most widely used approach associated with the teaching of reading in which phonemes (sounds) associated with particular graphemes (letters) are pronounced in isolation and blended together (synthesised).

Our young readers of KG 2 have been learning about blends and are exploring different objects in their immediate environment that have the blends. They have shared their knowledge with their peers. This activity helped build their confidence and communication skills. During the parent teacher meet they sang a song and identified the words which had blends in it. They have started applying their learning in real life scenarios, which is the basic essence of learning .

Health and Beyond

"came from a plant, Eat It; was made in a plant, Don't." – Michael Pollan, Author And Journalist

Raising healthy children sounds pretty simple: Good nutrition and 60 minutes of physical activity a day protects kids from obesity, diabetes, and a host of chronic diseases later in life.

These days though, health-conscious parents have to compete against any number of unhealthy temptations. "The environment plays a huge role in supporting unhealthy habits. As a parent, what can we do?

- Make it a family affair.
- Stay involved.
- Keep it simple.

And never forget: Parents play a key role in their children's choices and behaviors.

As our children learn the topic of "I love my food" they are well aware of the benefits of eating healthy food and why junk food should be avoided. They do understand that healthy food keep them well balanced and keep them more healthier and strong. The kids have exhibited their learning in a fun way of decorating their fruits(carving) and vegetables and speaking few sentences about them

Budding Influencer

Not all of us can do great things,
But we can do small things with great love...
-Mother Teresa

Children spend most of their time at school, so as a facilitator it's our responsibility to drive them in a right path with good virtues. TIPS truly believes that, a child needs to be an empathetic person first in order to be a global citizen. Caring for the society around you is as important as caring for self. With the ongoing seasonal illness on the rise it is extremely important that we should be responsible to take care of our health as well as those around us. As you can see our KG children are giving mask to the care taker. It however may be a simple gesture, but this small act of kindness with our constant incentive, will make caring, generous, kind, happy and international minded citizen for future.

GRANDPARENTS' DAY

The Indian Public school celebrated Grandparents' Day with gratitude and compassion for all the grandparents of KG students. This event holds a significantly special place in our hearts as it is a great time to remind ourselves of what our elders mean to us. It is a celebration of selfless and limitless love and it is an opportunity for both grandparents and grandchildren to express affection for each other. Grandparents play a pivotal role in grooming young minds, passing values and chiseling wisdom with their valuable guidance. A range of fun games were conducted to engage the grandparents with their grandchildren. The most surprising part about the event was that the grandparents were equally active and enthusiastic and kept par with the energy levels of their grandchildren,

TEACHERS' DAY

It is always been maintained that the future of a country lies in the hands of its children. Teachers, as mentors, can mould students into future leaders who then shape the destiny of the nation. They also play a significant role in our lives to help us become successful in our careers and business. They gently nudge us to become good human beings, better members of our society and even ideal citizens of the country. Teachers' Day is actually a celebration to acknowledge the hardship, challenges and the unparalleled role that the teachers play in our lives.

On Teachers' Day, students in our school organized various activities in order to entertain the teachers. These activities include dance, Music, mimicry of teachers,.Students showered teachers with flowers and handmade cards. All of this is a way for students to express their love and respect for their teachers.
