

TIPS BEACON

THE INDIAN PUBLIC SCHOOL, COIMBATORE

SPARK PLUG

TIPS gives utmost importance to manifest and encourage positive learning environment in an exclusive manner that Foster children's confidence, self-esteem and motivation in many ways'. The Sports day is an example of such events that celebrate and stimulate learning, creativity, and social skills. Sports activities and games are a great way to engage children and promote their physical and mental development. It helps children build confidence, develop leadership skills and nurture healthy competition.

The recent Track fest was a special event for our kindergarten students, as they got to compete with their peers from other campuses in various track events. Children showed great enthusiasm and sportsmanship, cheering for their teammates and opponents alike. They participated in races, relays, hurdles and interesting fun games. They displayed their physical skills and agility. They also received medals for their various achievements. Children get to learn how to follow rules, accept outcomes, celebrate victories and learn from mistakes. It'll also develop a positive attitude towards physical activity, and also help identify children's individuality and diversity by acknowledging their strengths, interests and needs. These values and attitudes can help them succeed in in life grow up into a global citizen.

LEARNING CURVE

"I AM ALWAYS READY TO LEARN ALTHOUGH I DO NOT ALWAYS LIKE BEING TAUGHT." — WINSTON CHURCHILL

Experiencing and exploring through senses is an important part of learning strategy. Students in KG were engaged in exercises that involved smelling different things and wearing blindfolds to identify objects that help them understand the value and significance of taking care of their sense organs.

We started our new theme 'Sharing the planet'. Learning and thinking about living things may be easy, but non-living things are more abstract. Students should be able to group living things together to see the important characteristics they share.

Our little explorers were excited to learn the difference between living and non-living items. To project their understanding of living things, they made colorful posters. They showed keen interest in the current topic. Young champs of TIPS excelled in positioning the objects confidently and demonstrated their critical thinking.

PARENT CHRONICLES

*'AT THE END OF THE DAY, THE MOST OVERWHELMING KEY TO A CHILD'S SUCCESS IS THE POSITIVE INVOLVEMENT OF PARENTS'.
JANE .D. HULL.*

We at TIPS, strongly believe that overall development of a child depends on the strong bond between the members of the learning community -namely the teachers, parents and the students. When all the three function in unison we can create magic. Hence our parent community are our biggest source of support. This month we had parent of V.P. Haasini of KG 2 A narrate the classic story of the Hare and the Tortoise using a flip book. Our children thoroughly enjoyed the session as it was interesting and interactive.

The children listened to the story carefully till the end. They were excited to see the Flip book, Each one of them took turns to see the book. They did retell the story in their own words. I felt really happy to take a session and share my views with the tiny tots. They answered questions which were posed to them during the story telling session. I really enjoyed the entire experience. Thank you to TIPS team for providing this opportunity.

P.Vaishnavi
(mother of Haasini)

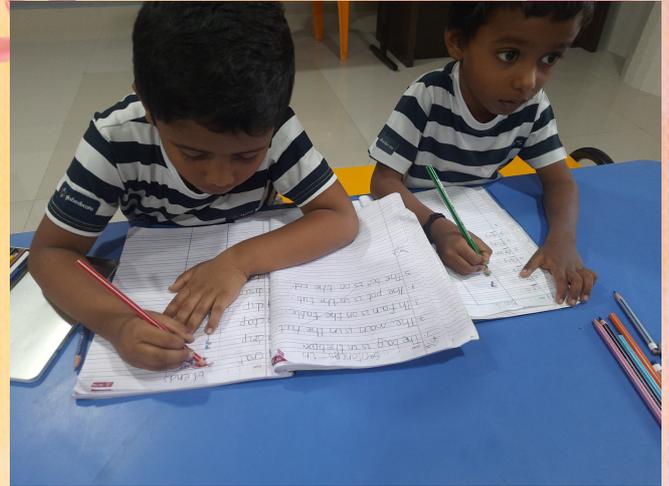

POCKET PHONICS

Phonics is, the best way to teach kids to read. Why is it so effective? Because phonics gives your child the tools to read almost every word he or she comes across. And that's really powerful.

How is phonics taught to children?

Phonics is best taught systematically, starting with the easiest elements and working up to more challenging ones. For most kids, it begins in kindergarten.

Kindergarten is all about exploring how letters and sounds work. Children learn to recognize the letters of the alphabet, and they learn how to hear the individual sounds in a word. When they put these two things together—when they match letters with their sounds—they're learning phonics. After a year filled with learning and fun, your child will be able to read comfortably.

At TIPS Kindergarten phonics is taught in a systematic way. Once our kids know the letters of the alphabet and the sounds they stand for, then they are ready to use them to read words and simple sentences. Building strong phonics skills in the early years of school is the key to your child becoming a strong, independent reader.

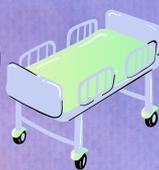

PHONICS

HEALTH AND BEYOND

"Being in good physical and mental health enables us to succeed in life and fully enjoy it". It is essential to have nutritious meals consistently to maintain physical and mental wellness. At TIPS, we offer a supportive environment where students can learn about healthy eating practices by participating in cooking activities and discovering new recipes. Making "Hummus Balls" was one of the children's most recent culinary endeavors. The little chefs learnt how to make hummus balls, which helps them strengthen their fine and gross motor skills by measuring, rolling, and creating balls. Along with this, they were eager to discover the hummus ball's nutritional value and health advantages.

At TIPS we incorporate brain gym into a well-rounded curriculum and used in moderation. Additionally, the specific activities we choose are age-appropriate and tailored to the needs and abilities of the children in the classroom. Students enjoy while doing the brain gym and feel refreshed.

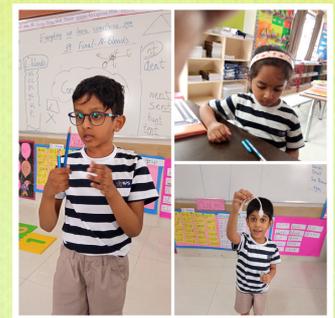

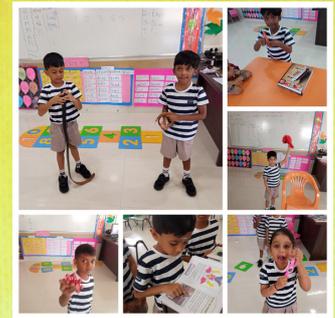

BUDDING INFLUENCER

“WE DO NOT LEARN FROM EXPERIENCE, WE LEARN FROM REFLECTION ON EXPERIENCE.”

-JOHN DEWEY

Learning is meaningful only if we make connections with our real life experiences. As we inquired into how we use our senses to explore the world around us children reflected on their understanding of the unit in various ways. They created models of hard and soft things, brought different things which had distinct smell, things used to take of our sense organs and so on. They explored their surroundings and shared their understanding with their peers. This helped to develop their research, social and communication skills.

As we learnt about consonant blends it was heartening to observe our students bringing various materials from home and identifying the blends that each of them had. Some of them brought the same material and ordered them by size as they learnt the concept in Math.

“The more reflective you are, the more effective you are.”

Pete Hall and Alisa Simeral

POTPOURRI

"THE MORE YOU PRAISE AND CELEBRATE YOUR LIFE, THE MORE THERE IS IN LIFE TO CELEBRATE."

-OPRAH WINFREY

The TIPS faculty and students participated in Onam celebrations at school, a harvest festival celebrated in Kerala. Children created a colorful flower Rangoli called a "Pookalam" using petals of various colored flowers that they brought from home. The school's staff members worked together to create the floral carpet. The enormous, multicolored floral carpet that covered the school's portico stood for tranquility, prosperity and resource sharing, kinship and love, and environmental preservation.

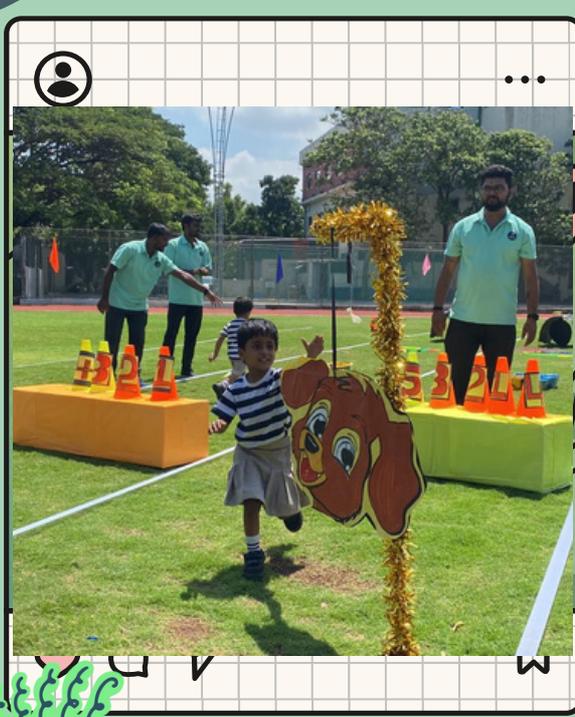

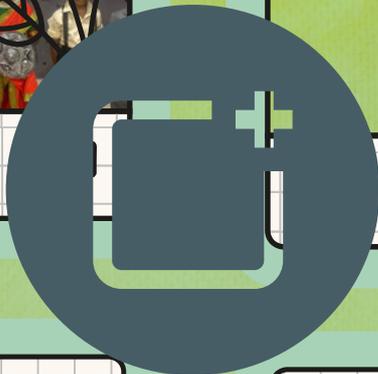

Another highlight was the Teachers Day event exemplifying the virtues of cooperation, reverence, and thankfulness. Little ones celebrated Janmashtami with a lot of fanfare. From birth until adulthood, various images of life were shown in a presentation.

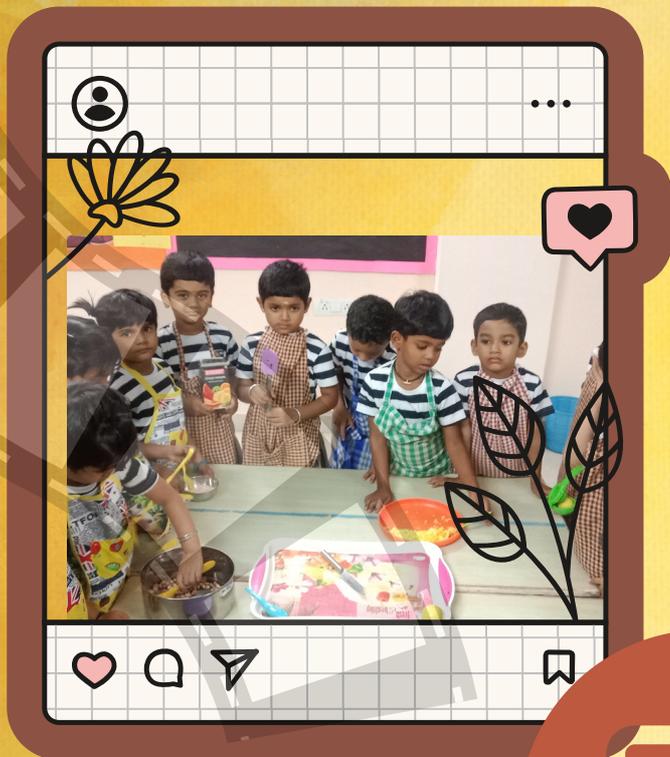

Hindi Diwas is celebrated every year on 14th September. To mark this occasion, TIPS celebrated Hindi Diwas in a grand way with a great zeal and enthusiasm . Our children enacted a skit in Hindi , recited rhymes and gave speeches in Hindi, sang songs and danced to some popular Hindi songs. Students exhibited their talents through different mediums. Their effort was appreciated by their peers, teachers and the chief guests.
