

# MY HAPPY SPACE

Our children spend their day inquiring and exploring meaningful learning experiences and hands on activities that help them learn basic skills in a fun and active way with the help of themes.

Students actively focus on developing their international mindedness in themselves. The children are engaged in uninterrupted play, stories, dance, games ,songs, rhymes that develop their language skills with the help of concept related activities.

In TIPS ,we believe that rhymes provide bite-sized learning opportunities for young children to develop their key developmental skills. Each child is given the stage to ,**'act out'** a favourite rhymes in front of their peers.

The applause from their peers encourages them and they gain confidence. Physical participation in action songs encourage children to develop their fine and gross motor control skills as well as balance and coordination.

# Vibrant Hues

Colours are indeed the smiles of nature! There is beauty and uniqueness in every colour just like our little heroes of Pre-kg. Colours have a significant impact on the children as they are still developing their cognitive and emotional skills.

Celebrating "Colors Day" in TIPS KG is super fun! It is an educational activity that helps young children learn about colors and develop their creativity. Our tiny tots celebrate color day to create a fun, interactive, and colorful environment where they can learn and play together while exploring the world of colors.

Our kindergarden classroom gets transformed into a colorful wonderland, with colorful streamers, balloons, and posters. It's a day when we come together to celebrate the incredible world of colors that surrounds us and fills our lives with joy, beauty, and creativity

# Beyond classroom walls

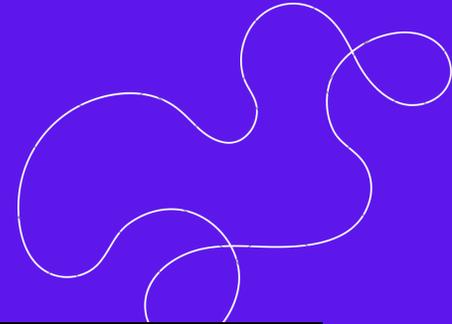

Dance has a major role in boosting your child's social development. When children dance, they express their emotions in front of their audience. With all that grooving, a child feels safe to open up to the world.

Our little ones are always ready for dance. They follow instructions, and enact the movements in their cute way.

Playing is a natural and enjoyable way for children to keep active, stay well and be happy. To have good physical and mental health and to learn life skills, they need various unstructured play opportunities.

In TIPS we provide such physical fun games .  
By listening, paying attention and sharing play experiences, this helps a child,

- ◀ To explore their feelings
- ◀ Develop self-discipline
- ◀ learn how to express themselves
- ◀ work out emotional aspects of life.

# Creative streak

Art and craft activities are an essential part of kindergarten education. They provide young children with opportunities to explore their creativity, develop fine motor skills, and express themselves through various forms of art. Our little cutie pies get a variety of art materials, including crayons, markers, colored pencils, scissors, and glue to showcase their originality.

Our tiny munchkins explore activities like finger painting, play dough, watercolor painting, paper plates crafts, handprint and footprint art, beaded jewelry, fruits and vegetable stamps, origami is to enhance their imagination and experimentation, and let children take the lead in their art projects while offering guidance and support when needed.

To encourage creativity, children explore their own ideas while offering guidance and support when needed. These activities not only foster artistic skills but also promote fine motor skills, creativity, and imaginative play in young children.

**“Crafting is the art of turning ordinary object into extraordinary things.”**
