

## TIPS BEACON

## THE INDIAN PUBLIC SCHOOL, COIMBATORE

SPARK PLUG 

Dear Kindergarten Families,

The month of October was so delightful as our little ones had an enchanting journey through the fascinating festival of Navarathri. The festival was celebrated with utmost enthusiasm all over and we were also more excited to share the magic of this festivity with our kindergarten stars.

Our young ones had a chance to learn about the significance of "Golu" or "Kolu", the reason behind the festival and even had the opportunity to create their mini Golu arrangement right here at school. At TIPS we are committed to nurturing not just the minds, but also the hearts of our little ones. We aim to introduce our children to the rich cultural heritage and traditions associated with this festival. During the Puja day, to truly experience the festive spirit,

- The kids were dressed in traditional attire.
- Performed simple dances and sang songs.
- Story of the Navarathri festival was told to the kids by our teachers.
- Dance and song performance by the teachers added more excitement to the celebration of this festival.

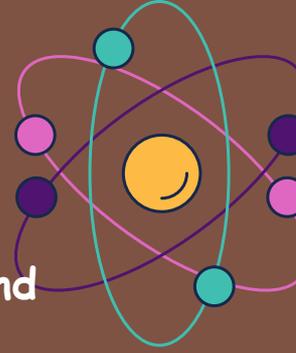

WE look forward to celebrating more festivals together and creating cherished memories.

# LEARNING CURVE

“You learn something new everyday.” -Ray LeBlond

Reflecting on one’s learning gives learners an opportunity to integrate their learning and interpret meaning for themselves. The more reflective we are the more effective we will be. As we inquired into the present theme “Sharing the planet”, our young minds pondered on various ways to take care of living and non-living things. Students came up with various ideas of caring for them.

One of them suggested hugging his brother would be one of the ways of taking care of him. Another child that she would prioritize taking care of herself so that she could take care of others well. Self love is absolutely important. Another child mentioned that he would support his grandma while walking. Helping mom while cooking and serving was yet another observation. Taking the pet for a walk, feeding it with proper food and water was yet another one. Each and everyone put up their views through their illustrations in the UOI note. Reflective thinking is crucial for understanding and processing our learning. It paves ways to move forward and create something new from what we have learned.

# PARENT CHRONICLE

"Your education is a dress rehearsal for a life that is yours to lead." - Nora Ephron

My Son got admission in TIPS last year. Here learning is fun, interesting and exciting. Feedback sessions with teachers include a variety of topic, including identification of the student, social and emotional development, and academic achievement. This school embraces a child-centered curriculum that promotes all-around development of the child.

The school offers excellent learning possibilities, and this exposure helps aspiring students prepare for the difficulties of a global society.

The school allows students to participate in a wide variety of programs both on and off school grounds. Examples of these events include festivals, arts, sports, and all other skill areas, programs to develop communication skills, cooking classes, competitions, field trips and more.

Personally as a parent I feel my child Dhiyan Isai has improved in social and communication skills under the guidance of the TIPS Institution.

# POCKET PHONICS

**"Phonics is the key to unlocking the door to literacy."**

We embarked on an exciting journey into the world of phonics, helping children learn to read and write by understanding the relationship between spoken sounds and written symbols. We uncovered the mystery and magic behind the silent 'E.' Phonics is the cornerstone of early reading and writing development, and understanding the role of the silent 'E' is a pivotal moment in a child's literacy journey.

Understanding phonics, particularly the role of the silent 'E,' provides a strong foundation for reading and writing. It helps children decode words, enhances spelling skills, and fosters a love for literature. By mastering the magic 'E,' children become confident, independent readers and writers. Our students understood the essential building blocks like consonants and vowels, threw spotlight on a very special character: the silent 'E.'

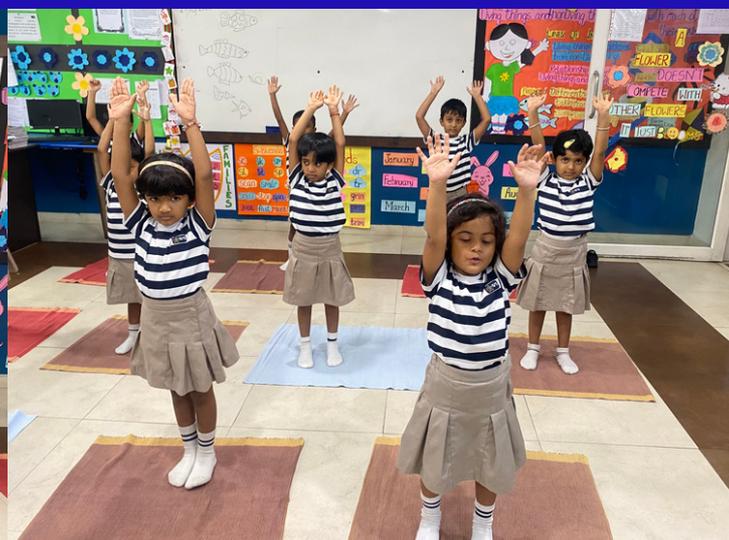

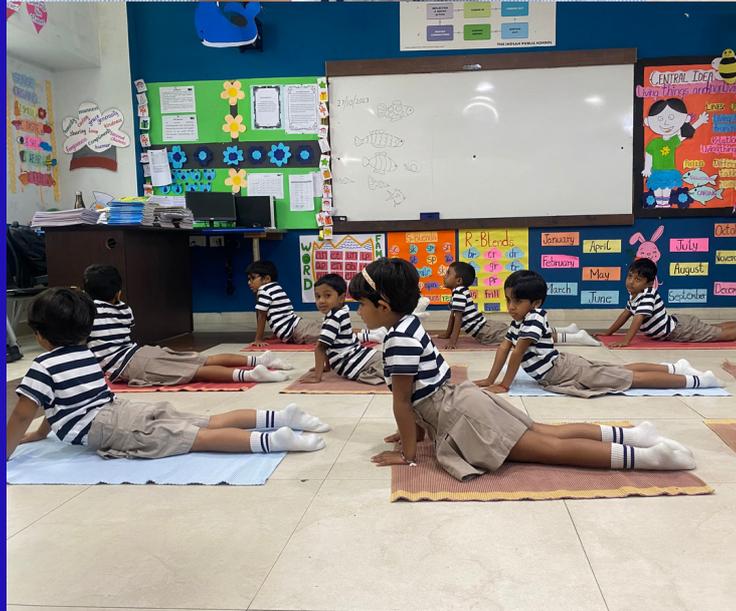

# HEALTH AND BEYOND

"The body benefits from movements, and the mind benefits from stillness."

- Sakyong Mipham

For a kid to be completely healthy, both their physical and mental health must be maintained and improved. They also need to engage in physical activity to maintain excellent health. It is essential to cultivate a wellness-oriented approach, and Yoga is a spiritual tool with enhanced health and well-being as its positive effects. Yoga trains the body and mind to achieve psychological balance.

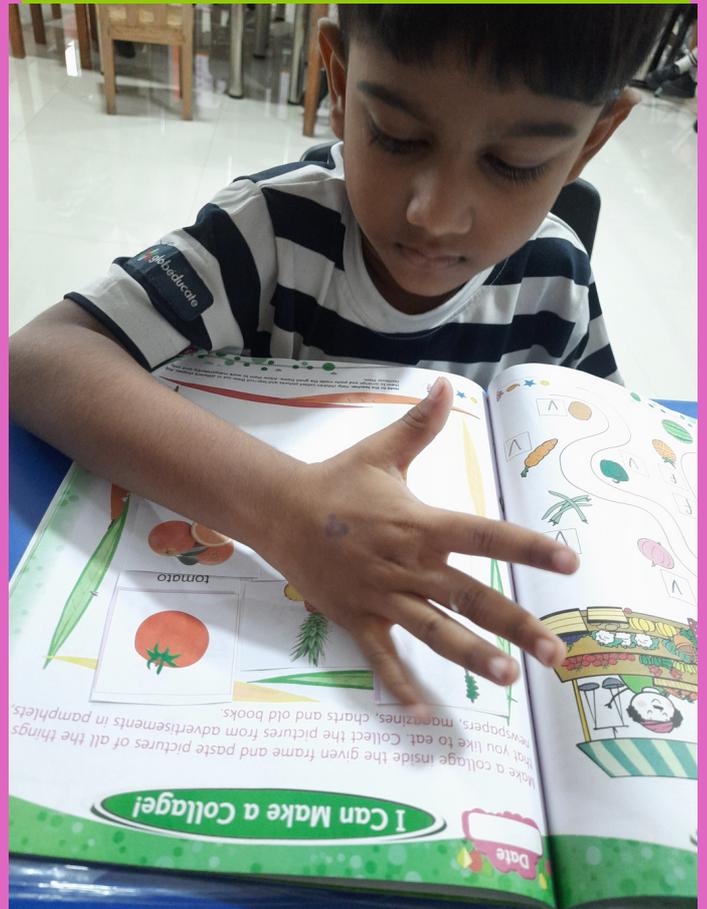

At TIPS, we think that these sorts of approaches are essential to teaching children how to pay attention to their bodies, emotions, and ideas. We also think that yoga encourages children to grow in positive ways, develop into stronger people, and become active members of the community. We believe yoga helps our younger children establish self-regulation, which improves their well-being, interpersonal relationships, and their academic achievement. Our children have been practicing yoga asanas and have learned a lot about the benefits it brings. It motivates students to explore their body movements and connect with the joyfull feeling associated with physical activity and breathing awareness.

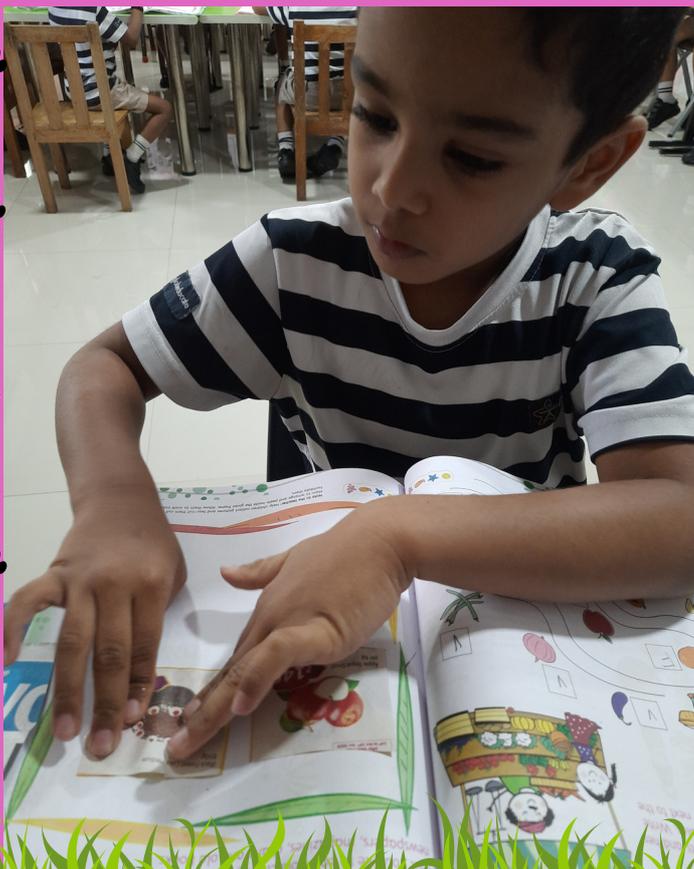

# BUDDING INFLUENCER

"Nature is not place to visit, It is home." -Gary

EVS as a subject is equally important as any other subjects. Unless children know what the things are present around them are, they won't be able to interact with it properly. In EVS subject children get to learn about things ranging from their immediate environment (plants, animals, air, water, soil, food, human body parts, clothes etc.) to their wider environment (neighbourhood, school, etc.). A wide range of environmental subjects are covered in EVS. Children who learn these become more conscious of their environmental, social, and cultural surroundings. To develop an interest in knowing their environment, children have to be given an interesting introduction to their environment.

Once they develop an interest in it, they will ask questions, investigate, try to connect and develop their insights into the environment. Thus, EVS helps kids become knowledgeable and engaged members of society. The kids of KG2 learn about plants, trees, vegetables and fruits under the topic "Our natural world". They enjoyed learning the topic by making a collage on their own of their favourite food.

# POTPOURRI

Mixed  
bag

“Collaboration between parents and teachers is the key to unlocking a child's potential.”

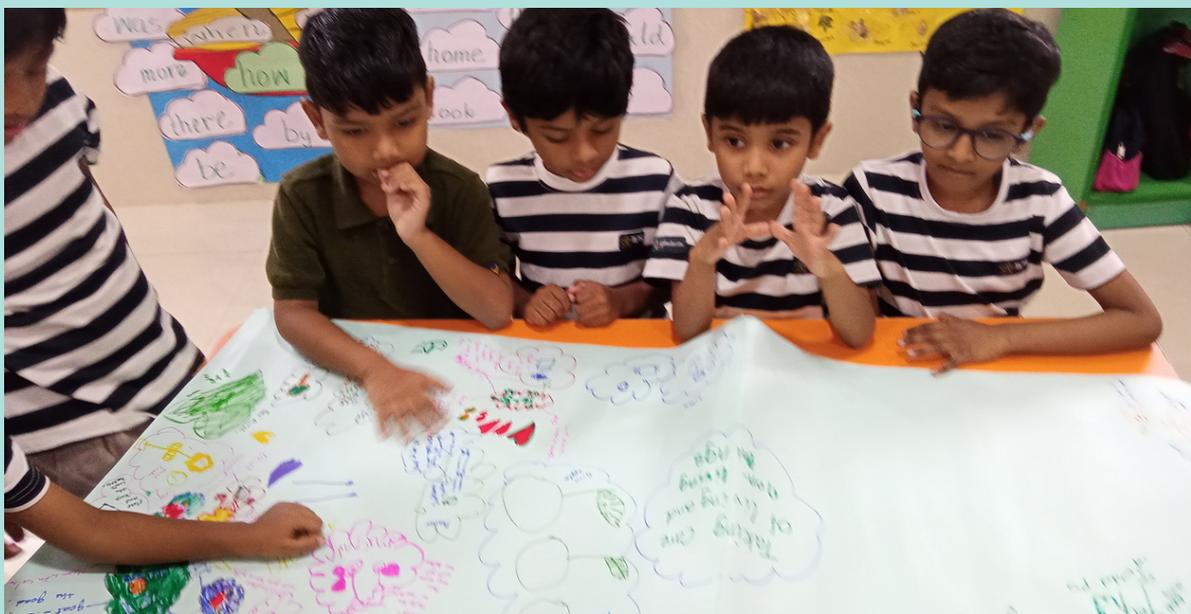

At TIPS, we believe that effective communication and collaboration between parents and teachers are crucial to providing the best start for our youngest learners. It provides a unique opportunity for parents to engage with their child's educational journey. We believe in fostering a sense of community. PTMs assist in establishing a network of assistance where parents, educators, and the school may collaborate to give our KG pupils a supportive learning environment. With tremendous enthusiasm, our tiny tot showed their parents what they had learned.

We are thrilled to share the joy and enthusiasm of our youngest learners as they recently celebrated Navratri, the festival of colors, dance, and devotion, right here at our school.

"Our Little Stars," truly shone as they embraced the spirit of Navratri. With tiny feet moving to the beat of dhol, these youngsters captured the essence of this vibrant festival. Our KG students learned and performed the Dhandiya, a traditional folk dance that symbolizes unity and devotion. Their colorful attire and graceful steps left everyone mesmerized.
